8	Marketing Decision Analysis	30	1	4
Sum				30
Semester weeks (incl. exams)		15		

Module Descriptions

Master Business Consultancy International

First Semester

CORE CURRICULUM

Module:	Module title:	Credits:	Hours/Week:
	Applied Economics I	3 ECTS	2 SWS
Degree Programme	MBCi		
Semester	1st semester		
Course Leader	Strobach Kerstin		
Level	Intermediate		
Course prerequisites	Economics as being taught in Bachelor Business Studies (i.e. Principles of Economics/Economics 101)		
Block course	No		
Participants	All MBCi		
Groups	Two groups per year		
Contribution to subsequent modules	Applied Economics II, Risk Management, Strategic Management & Business Policy, Corporate Finance, Pricing Analytics and Strategies.		
Bibliography	<p>Forgang, W.G. and Einolf, K. W. (2007): Management Economics, An Accelerated Approach.</p> <p>McKenzie, R.B. and Dwight, R.L. (2010): Microeconomics for MBAs.</p> <p>Froeb, L.M and McCann, B.T. (2010): Managerial Economics: A Problem-Solving Approach</p>		
Course objectives	<ul style="list-style-type: none"> Students have gained a basic understanding of decision theory, in particular they understand the "behavioral approach" to decision making and are aware of the most frequent decision traps; Students are able to analyse and understand the "microeconomic" environment, i.e. their or a particular company's "market setting" as a basis for guessing trends and forming scenarios and developments in particular businesses and industries: they can apply competitive analyses and identify the most important drivers in markets and industries; Students are in a position to practically apply key microeconomic concepts for business/management decisions (e.g. Principal Agent Theory, Game Theory; Pricing Techniques etc.) Students are familiar with current (micro)economic topics such as e.g. the digital economy, on-demand- economy, a.s.o. 		
Format	ILV		
Evaluation	Continuous evaluation		
Course content	Decision Theory and Decision Traps (Behavioral Economics); Market and Competition Analysis: Market Structure and Conduct; Game Theory; Economics of Information; Asymmetric Information and Principal-Agent-Theory; Elasticity and Pricing Policy; Cost-benefit-analysis.		
Module version	2015		

Module:	Module title:	Credits:	Hours/Week:
	Consultancy Skills	4 ECTS	3 SWS
Degree Programme	MBCi		
Semester	1st semester		
Course Leader	Elfie Hofer (Institut für persönliche Kompetenzentwicklung)		
Level	Beginner		
Course prerequisites	None		
Block course	Partially		
Participants	All MBCi		
Groups	Yes		
Contribution to subsequent modules	All other modules that require personal and professional skills; e.g., Business Consultancy I & II, Case Study

Course objectives	<p>Students have a grasp of "emotional" leadership, the roles and responsibilities, and the ethical conduct of professional consultants. Students can accurately assess their current individual strengths and weaknesses with respect to knowledge, skills and experiences required of successful professional consultants. Based on their assessed competency levels they are able to determine professional development goals in the skills/knowledge/experience areas expected of "experts" in their targeted career field/job function(s).</p> <p>In a skills-intensive format, students can demonstrate professional communication and critical listening skills. They can give, receive and apply pointed feedback on complex issues, can negotiate successfully in a variety of settings and assert effective decision-making. They are able to structure and effectively deliver a range of professional "pitches" in which they persuasively argue their position while considering the stated or unexpressed needs or goals of potential (assumed) clients.</p>		

Module:	Module title:	Credits:	Hours/Week:
	Consultancy Skills	4 ECTS	3 SWS
	Students demonstrate an understanding of team performance and the contributions of team roles and group dynamics in the context of working and collaborating on intercultural consultancy project teams. They know how to facilitate client meetings, evaluate/constructively critique proposals, dealing with diverse needs and interests, recognizing and managing conflict, in order to lead teams to appropriate problem solutions.		
Format	WS		
Evaluation	Continuous evaluation		
Course content	<p>Personal competencies profiling and professional leadership development planning for prospective business consultants.</p> <p>Principles, best practices and challenges of advanced communication (e.g., interviewing) and negotiation skills for professional consultants, including assertiveness, decision-making, „sales-„ and argumentation skills; target-croup specific, professional persuasive presentation/„pitching“ skills</p> <p>Professional leadership (including „self-“& people leadership) and collaboration skills inventory. Hands-on leadership/facilitation of intercultural groups and interdisciplinary project teams.</p> <p>Challenges and promises of group dynamics and multiple perspectives. Managing meeting and ensuring conflicts in complex business situations and/or with challenging stakeholders; negotiation and mediation in the context of intercultural team collaboration and consultancy situations.</p>		
Module version	2015		

1.1.1.1 SPECIALISATION „MARKETING ANALYTICS“

Module:	Module title:	Credits:	Hours/Week:
	Quantitative Marketing Research	5 ECTS	3 SWS
Degree Programme	MBCi		
Semester	1 st Semester		
Course Leader	Virginia Grögl		
Level	Beginner		
Course prerequisites	Introductory Knowledge of Statistics & SPSS		
Block course	No		
Participants	MBCi_MA		
Groups	2 Groups		
Contribution to subsequent modules	Quantitative Analysis II; Special Topics in Marketing Analytics I; Special Topics in Marketing Analytics II		
Bibliography	<p>Malhotra, Naresh K.: Marketing Research An Applied Orientation: GlobalEdition, Pearson</p> <p>Polonsky, Michael Jay; Waller, David S.: Designing and Managing a Research Project, Sage</p> <p>Field, Andy: Discovering Statistics Using SPSS, Sage</p>		
Course objectives	<p>After completion of this module, students should be able to:</p> <p>Conduct, evaluate, and monitor a marketing research project</p> <p>Identify and explain key data collection methods employed in quantitative social research</p> <p>Develop quantitative research designs</p> <p>Critically evaluate quantitative research findings</p> <p>Demonstrate a critical understanding of quality criteria and ethical guidelines in quantitative social research</p> <p>Demonstrate skills in report writing and data presentation</p>		
Format	ILV		
Evaluation	Continuous evaluation		
Course content	<p>Quantitative research methods of data collection</p> <p>Questionnaire Design; Qualtrics</p> <p>Sampling Techniques</p>		

Module:	Module title:	Credits:	Hours/Week:
	Quantitative Marketing Research	5 ECTS	3 SWS
	Multivariate statistical methods: Reliability analysis, logistic regression, factor analysis, cluster analysis		
Module version	2015		

Module:	Module title:	Credits:	Hours/Week:
	Quantitative Analysis I	5 ECTS	3 SWS
Degree Programme	MBCi		
Semester	1st Semester		
Course Leader	Virginia Grögl		
Level	Beginner		
Course prerequisites	Introductory Knowledge of Statistics & SPSS		
Block course	No		
Participants	MBCi_MA		
Groups	2 Groups		
Contribution to subsequent modules	Quantitative Analysis II; Special Topics in Marketing Analytics I; Special Topics in Marketing Analytics II		
Bibliography	<p>Mario F. Triola: Essentials of Statistics, Pearson Education</p> <p>Gary Koop: Analysis of Economic Data, John Wiley & Sons</p> <p>Julie Pallant: SPSS Survival Manual, McGraw-Hill</p> <p>Andy Field: Discovering Statistics Using SPSS, Sage</p>		
Course objectives	<p>After completion of this module, students should be able to:</p> <ul style="list-style-type: none"> - Demonstrate knowledge of basic empirical methods used in economics, marketing and related fields - Demonstrate the technical, statistical and interpretative skills necessary to conduct, evaluate and monitor elementary research projects - Competently perform essential data analysis by use of the computer software package SPSS 		
Format	ILV		
Evaluation	Continuous Evaluation		
Course content	<ul style="list-style-type: none"> - Review of elementary concepts from mathematics, probability & data analysis - Descriptive statistics & graphical representation of data - Covariance and correlation - Statistical estimation and confidence intervals - Hypothesis testing - Tests for means and proportions - Chi-squared test - Simple linear regression - Multiple linear regression - Nonlinear regression - Analysis of variance - Introduction to SPSS environment/IT software - Logit and Probit regression (optional) - Exploratory factor analysis (optional) 		
Module version	2015		

Module:	Module title:	Credits:	Hours/Week:
	Business Analysis	4 ECTS	2 SWS
Degree Programme	MBCi – Marketing Analytics		
Semester	1st semester		
Course Leader	Marie Nitzlader		
Level	Beginner		
Course prerequisites	none		
Block course	No		
Participants	all „Marketing Analytics“ students		
Groups	None		
Contribution to subsequent modules	None		
Bibliography	<ul style="list-style-type: none"> • Damodaran, Aswath: "Damodaran on Valuation: Security Analysis for Investment and Corporate Finance", John Wiley & Sons, current edition • Palepu, Krishna; Healy, Paul; Peek, Erik and Bernard, Victor: "Business Analysis and Valuation", Cengage Learning EMEA, current edition • Horngren, Sundem, Elliott, Philbrick: "Introduction to Financial Accounting", Pearson New International Edition, current edition • Atrill, Peter; McLaney, Eddie: "Management Accounting for Decision Makers", Pearson Education Ltd., current edition 		
Course objectives	<p>Students will be able to...</p> <p>... understand the relationship between business events and financial statements so that they will understand how a given business event / business transaction affects the income statement, balance sheet and the statement of cash flows</p> <p>...understand the accounting cycle, collection of accounting data, entry into the accounting system, and the preparation of basic financial accounting statements.</p> <p>...become familiar with the necessary tools to value a company and access the financial health of an organization</p> <p>...analyse value of company for the purposes of making investment decisions</p>		
Format	ILV		
Evaluation	Continuous evaluation		
Course content	<ul style="list-style-type: none"> • Necessary accounting methods such as double entry bookkeeping, Accounting for non-current and current assets; Accounting for liabilities and equity, revenue and expenses • Basis financial ratio analysis 		

Module:	Module title:	Credits:	Hours/Week:
	Business Analysis	4 ECTS	2 SWS
	<ul style="list-style-type: none"> • Basic cost concepts (variable – fixed, direct – indirect); Breakeven analysis • Different dimensions of the valuation process including the general environment, market, management, strategy, financial performance & outlook will be covered • Sector and market background analysis; • Company management and strategy; • Analysis of strengths and weaknesses, financial performance analysis and the outlook

	Applied Economics II	3 ECTS	2 SWS
	exchange rate regimes and its impacts on businesses. Economic and financial crises: how to be prepared and how to survive.		
Module version	2015		

Module:	Module title:	Credits:	Hours/Week:
	Business Consultancy I (Simulation)	4 ECTS	2 SWS
Degree Programme	MBCi		
Semester	2nd semester		
Course Leader	Robert Pichler		
Level	Intermediate		
Course prerequisites	All courses to date		
Block course	yes		
Participants	All MBCi		
Groups	yes		
Contribution to subsequent modules	Business Consultancy II		
Bibliography	Books: Kubr, M.; "Management Consulting: A Guide to the Profession" Bookwell Publications 2005 ; Stroh, L.; Johnson, H.; "The Basic Principles of Effective Consulting" Lawrence Erlbaum Associates 2005		
Course objectives	Identifying, diagnosing, and resolving client issues as a management consultant demand not only superior conceptual and analytical capabilities but also mastery of core professional skills. Given the importance of such multi-faceted competencies for personal, team, and client success, this module is designed to help the students develop consulting skills while exposing the students to the dynamics of consulting work and consulting lifestyles. To achieve this objective, the module is structured to integrate practical knowledge, simulated experience, and active discussion of three different topics relevant to the total consulting experience. These are the consulting engagement lifecycle, the various methodological approaches and tools used by consultants in framing and solving clients' problems, and finally the strategic-thinking and behavioral techniques that facilitate the consulting process.		
Format	ILV		
Evaluation	Continuous evaluation		
Course content	The students will learn the cognitive processes involved in framing and designing the consulting engagement specifically, hypothesis generating and testing, using a set of cases that track the work of actual consulting teams as they move through the processes of initiating and completing client projects. In addition the following subjects will also be covered: Work-planning, data-gathering, field-interviewing, and communicating with clients.		
Module version	2015		

Module:	Module title:	Credits:	Hours/Week:
	Master Thesis Seminar I	2 ECTS	1 SWS
Degree Programme	MBCi		
Semester	2nd Semester		
Course Leader	Karin Dobernig

Bibliography	Saunders, Mark, Philip Lewis, and Adrian Thornhill. Research methods for Business Students. Latest edition. Pearson. Urquhart, Cathy (2012): Grounded Theory for Qualitative Research: A Practical Guide.		
Course objectives	<p>In the course of this module, students develop the capacity to:</p> <ul style="list-style-type: none"> - Competently search and review academic literature - Devise ideas for interesting research projects - Develop and communicate a comprehensive research proposal - Provide constructive feedback 		
Format	ILV		
Evaluation	Continuous Evaluation		
Course content	<p>The course provides students a brief review of important concepts and principles in the area of academic research and aims to equip them with the practical tools and skills to plan, implement and complete a research project as well as compile comprehensive research proposals.</p> <p>Additionally, it prepares students for the process of writing a Master's Thesis and offers instructions, guidelines and advice regarding the compilation of academic documents more generally. The course also highly encourages collaborative learning and the handling of feedback among students. Students present their research proposals to faculty members and fellow students.</p>

	Study Trip	2 ECTS	2 SWS
Degree Programme	MBCi		
Semester	4th semester		
Course Leader	Robert Pichler		
Level	Advanced		
Course prerequisites	All courses to date		
Block course	yes		
Participants	All MBCi		
Groups	yes		
Contribution to subsequent modules	-		
Bibliography	-		
Course objectives	The study trip complements the classroom experience by giving the opportunity to interact with leading professionals. This enables students to obtain a better understanding of the commercial life in reality.		
Format	ILV		
Evaluation	Continuous evaluation		
Course content	This course encompasses a 7-day study trip including the visiting of a financial centre and companies from various areas, including international consultancy, financial and marketing firms. Students have the possibility to meet professionals and discuss current topics with them to find out how professionals perceive a variety of current business issues. This should enhance students' education with a practical experience and gives them a better sense how business works in reality.
